

## Build, Deployment & Environment Engineer

- **Fast Growing Dynamic Company**
- **Based in Sydney's North**
- **Close to Transport and Parking**

### The Company

Baseplan Software is a well established, best of breed ERP software company with a high profile in the Hire and Rental Industry.

Due to rapid growth and product development, Baseplan is looking to add an experienced, professional, **IT Network Engineer** to our Sydney team.

### The Position

Working closely with both the development & testing teams, you will be involved in the configuration and maintenance of multiple test and production environments. You will be responsible for the successful deployment and maintenance of, SQL components and applications on the test platforms and the rollout of these systems to client production for both in-house use as well as remote deployment to customer sites. The technical environment includes SQL Server 2005/2008, VB6, VB.NET, Windows Server 2003/2008, Terminal Services, Hyper-V, Virtual Server, Active Directory, 50 workstations, and 30 servers.

The following will also be a key part of this position:

- Managing and maintaining test environments and coordinating and planning releases into the environments.
- Working closely with development and test support teams to migrate applications from test into production.
- Developing and configuring tools to assist and streamline configuration and change management.
- Facilitating tools and processes for effective communication and cooperation among various IT teams within the IT group.
- Extensive contact with customers when deploying test and live systems.
- Will include occasional after hours work (2-3 evenings per month) on remote systems.
- Closely working with support analysts to resolve customer issues

### Skills Required

- Solid understanding of Internet technologies with good understanding of Transact SQL, batch files and VBScript.
- Provide server based support for applications running on SQL Server, Win 2000/2003/2008, IIS 6/7
- Experience with all Microsoft Desktop Operating Systems
- Desktop support experience
- Strong analytical skills to diagnose and resolve software and hardware faults
- Windows 2003/8 Server experience and qualifications
- Active Directory knowledge
- Experience with commercial backup applications (preferably Microsoft Forefront)
- Experience with commercial networked Antivirus solutions.

- Exposure to WAN/Firewall/VPN technologies.
- Network printing experience
- Commitment to customer satisfaction
- Ability to work both independently with minimal supervision and as part of a team
- Excellent Organisational/Coordination skills
- Excellent communications skills, verbal and written
- Excellent documentation skills including formatting and presentation
- Immaculate presentation
- Team Player and result driven
- Attention to detail and fast learner
- Able to troubleshoot network issues by applying networking skills.

#### Qualifications Preferred

- MCSE / MCITP Server Administrator or Enterprise Server Administrator Certified
- Microsoft Exchange Server 2003/2007/2010
- Microsoft Forefront
- Extensive experience / qualifications with Firewall / VPN technology
- Experience with deployments of secure web applications, DMZ and firewalls would be valued

The position is based at our Sydney Head Office in Thornleigh which is close to rail and has free undercover parking.
